How to Play

1. Pick a card and read aloud your favorite question.
2. All other players write down their personal answers to the question.
3. All answer sheets are then collected by the player to your right (The Reader) and read aloud in no specific order. (Players should not give any hints while answers are read aloud.)
4. After hearing ALL of the answers, you must attempt to match which player wrote which answer. (Make all of your matches before answers are revealed... not one at a time.)
5. After you try to match ALL of the answers, The Reader reveals how many answers you matched correctly.
6. For every correct match, fill in one bubble at the top of your answer sheet. Play moves clockwise.

How to Win

In a four player game, the first player to fill in eight bubbles wins. With five-six players, the first player to fill in all ten bubbles wins.

Notes on Play

- There are no right or wrong answers to any of the 200 questions!
- Write neatly!
- Players will decide how long players have to write and guess answers.
- After your turn, place the used card at the bottom of the card deck.
- If the game ends quickly, just play again!
- Add the enclosed cards to our best-selling Loaded Questions® board game for hundreds of hours of fun!
