loaded questions[®] the game

Contents

Gameboard, Box of 110 Cards (featuring 880 Loaded Questions[®]), Answer Pad, Custom Die, 6 Pencils, 6 Custom Game Pieces

Object

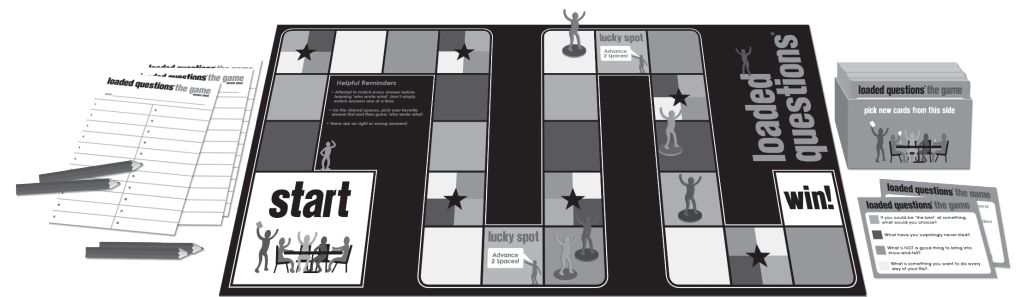

Be the first player to reach the WIN space by rolling high, matching players' answers correctly on your turn, and writing the 'favorite' answer on the starred spaces.

Set-Up

1. Place the board and box of question cards in the middle of the play area.
2. Select game pieces and place them on the START space.
3. Take an answer sheet and pencil and write your name at the top.
4. Shortest player rolls first. Play moves clockwise.

If you have any questions, comments or feedback about this game, you can always send us an email from www.LoadedQuestions.com, which features more Loaded Questions[®] games, including Loaded Questions[®] Party, Adult Loaded Questions[®], Loaded Questions[®] Junior and Loaded Questions[®] On the Go, and all of our other 'creative games for active minds'.

On Your Turn...

1. Roll the die and move the number of spaces shown.
2. Pick the next card and read aloud one of the questions matching the colored space you're on. **Both sides of the card are used.**

(If you're on a yellow space, look at both sides of the card and read aloud your favorite yellow question.)

- If you land on one of these starred spaces, look at all questions from both sides of the card and choose any question to play. You will also pick your favorite answer to the question, and the player who wrote your favorite answer advances two spaces.

- If you land on one of the two 'Lucky Spots' after rolling the die, advance as shown and play the space you land on. If you land on one of these spaces at the end of a turn, advance as shown and wait until your next turn to roll.

3. All other players (not you) secretly write their personal answers to the question on their answer sheet.

loaded questions the game		loaded questions the game		loaded questions the game	
name: Nicole		name: Rachel		name: Lily	
1. Sit on a beach	2.	1. Eat tacos	2.	1. Take a nap	2.
3.	4.	3.	4.	3.	4.

(There are no right or wrong answers, but players are encouraged to get creative!)

4. All answers are collected, shuffled and read aloud by the player to your right. (You will not see the handwriting, because the player to your right is reading the answers aloud.) After hearing ALL of the answers, you must match which player wrote which answer.

- The reader should familiarize himself/herself with the answers before reading them aloud.
- It helps to hear the question again before answers are read aloud.

Attempt to match EVERY answer BEFORE learning 'who wrote what'. Don't simply match answers one at a time.

- ★ If you're on a starred space, you will first pick your favorite answer and then guess which player wrote which answer. Whether you like an answer because it was hilarious, honest, creative or ridiculous, it is up to you in deciding your 'favorite'.
 - Players should be discreet when answers are read aloud, and when you are selecting your favorite answer and guessing 'who wrote what'.
5. The player to your right reveals which player wrote which answer. You advance one space for every correctly matched answer. If you're playing a starred space, the player who wrote your favorite answer advances two spaces on the board. Used cards are placed at the back of the card box. Play moves clockwise.

How To Win

The first player to land on the WIN space wins the game. Players are not required to land on the WIN space with an exact advance. In the unlikely event two players reach the WIN space on the same turn, then both players win the game!

Notes On Play

- There are no categories for the questions, and no right or wrong answers to any of the questions. Just write neatly!
- Players will decide how long a player has to determine an answer.
- Although every turn offers at least two questions to choose from, if younger players are having trouble understanding the questions or you simply don't like your choices, feel free to simply pick another question on the card. It's just a game!
